

Water Decontaminator Trash Capture

Trash Capture Catch Basin Insert

Patented

www.wdfilters.com

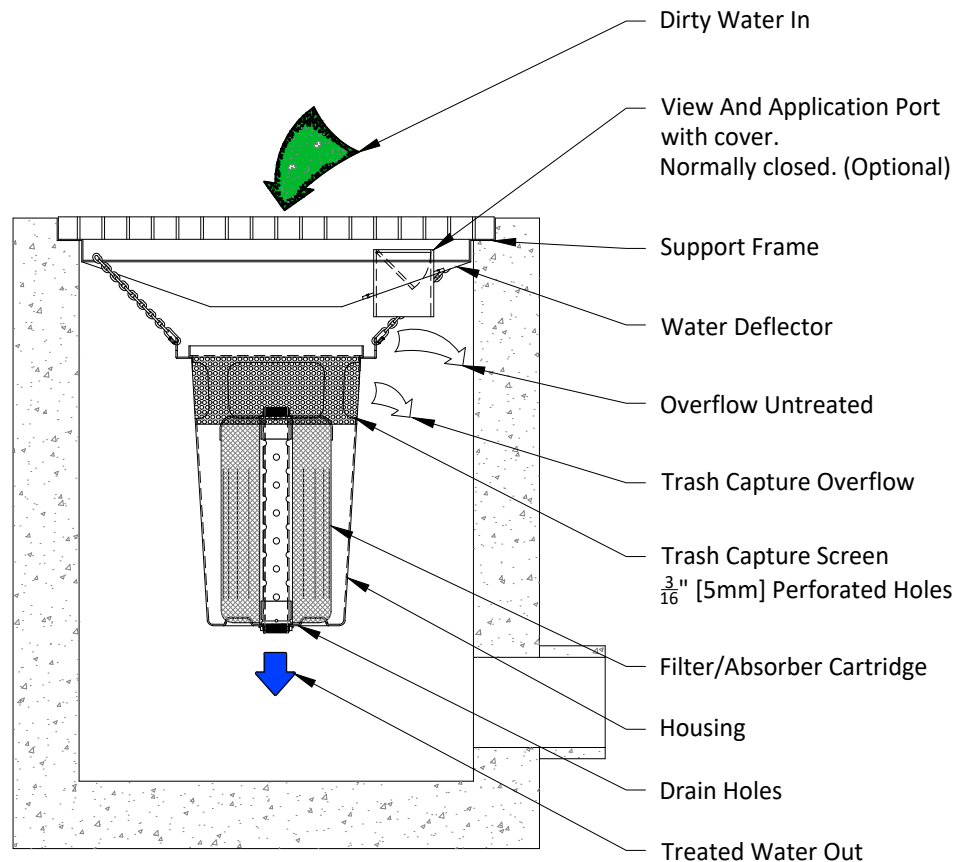

The Water Decontaminator Trash Capture series is a patented, environmental product that is placed under a catch basin grate to help remove trash, sediment, oil and contaminants from run off. Oil and contaminants are captured in a disposable cartridge. The absorber cartridge uses recycled waste products, essentially fighting pollution with pollution.

Applications:

- Urban run-off
- Roadways
- Parking lots
- Industrial sites
- Manufacturing
- Maintenance areas

Helps clean parking lot run-off, catch basins, ponds, sumps and spills. Cleans storm run-off by screening sediment, debris and other solids into a sediment trap. Oils and chemicals are absorbed in a disposable cartridge.

*Model TCU-2, 4, 6, 6V

The Water Decontaminator Trash Capture series is engineered and patented for the treatment of stormwater run off. We design our filters to meet or exceed stormwater best management practices (BMP's) and best available technology (BAT).
